

About SCO

The Surgery Center of Oklahoma is a 32,535 square foot, state-of-the-art multispecialty facility in Oklahoma City, owned and operated by approximately 40 of the top surgeons and anesthesiologists in central Oklahoma.

The facility has been accredited by the AAAHC since 1998 without interruption and has annually provided care to thousands of patients. Because SCO is completely physician-owned and managed, they control every aspect of the facility from real estate costs, to the most efficient use of staff, to the elimination of wasteful operating room practices that non-profit hospitals have no incentive to curb.

Transparent, direct, package pricing means your employer-sponsored health plan knows exactly what the cost of the service will be upfront.

Fees for the surgeon, anesthesiologist and facility are all included in one price. There are no hidden costs, charges or surprises.

The SCO pricing is actually outlined on their website and is the actual price the Plan will pay for services you may receive.

Because there are no surprises at SCO, your health plan is willing to provide you with an enhanced benefit when you choose SCO for your medically-necessary procedures – **you will have \$0 co-insurance and the cost of the surgery will not be subject to your deductible.** Your only expense will be a one-time, \$200.00 co-pay that you will pay to the provider at the initial examination. This co-pay will be credited to your health plan deductible.

Attached is a list of procedures that are performed at SCO and eligible for the \$0 coinsurance benefit.

SCO is truly committed to providing you with the best quality care at the lowest possible price.
